Summary

Data Scientist with 5 years of experience building and deploying machine learning models for e-commerce and fintech companies. Skilled in Python, deep learning, and cloud-based ML deployment.

Skills

Python, pandas, NumPy, scikit-learn, TensorFlow, PyTorch, SQL, A/B testing and experimental design, AWS (SageMaker, S3, EC2), Matplotlib, Seaborn, Tableau, MLflow, Airflow, Docker, Spark

Experience

Senior Data Scientist, FinEdge Analytics (2022-Present)

- Built a churn prediction model using scikit-learn and TensorFlow, improving retention by 12%.
- Deployed models to production on AWS SageMaker with MLflow tracking and Airflow-orchestrated retraining pipelines.
- Designed and analyzed A/B tests for pricing experiments.

Data Scientist, ShopWave Inc. (2020-2022)

- Built recommendation systems using PyTorch, increasing conversion by 8%.
- Used Spark for large-scale feature engineering on 500M+ row datasets.
- Presented insights to executive stakeholders via Tableau dashboards.

Education

M.S. in Computer Science, University of Washington (2020)

B.S. in Statistics, University of Michigan (2018)
